**Subject:** Acceptability of the Front Range Landfill in Erie, Colorado

Dear Joyce,

The Front Range Landfill facility continues to be acceptable pursuant to the CERCLA Off-Site Rule. Here's the newest verification of continued acceptability (VCA):

Because the OSR acceptability status is dynamic in nature and subject to change, Region 8 has instituted a policy where EPA conducts a VCA on facilities that have previously been found acceptable under the CERCLA Off-site Rule (OSR) such as the Front Range Landfill facility in Colorado. The purpose of the VCA is to ascertain changes in a facility's compliance status or releases, and to confirm that the facility continues to be acceptable. VCAs are conducted when a request for OSR status is received and the previous VCA was conducted more than 60 days prior. VCA are valid for 60-days.

A VCA was completed for the this landfill on January 17, 2018, so the VCA is valid until March 18, 2018. CERCLA waste shipments sent to the Front Range Landfill until March 18, 2018 are in full compliance with the OSR. If CERCLA wastes are planned to be sent after this date, please let me know, so that a new VCA can be conducted.

Thank you.

Linda Jacobson

**Subject:** RE: Front Range Landfill in Erie, Colorado

Hi Linda – The contractor is almost ready to ship waste off-site. Could you let me know if the Front Range Landfill in Erie is still acceptable?

Thanks!

Joyce
